Our Brand Story

Founded in 1982,

our company operates in Izmir and is an industrial manufacturing organization specialized in metal powder production.

With decades of experience in the production of aluminum, copper, and zinc powders, we deliver products that meet both domestic and international customer requirements, in full compliance with high-quality standards.

With a total of 2,500 m² of production area and 2,500 m² of storage space, supported by four melting furnaces and a team of more than 40 skilled professionals, we provide our customers with sustainable, reliable, and fast solutions.

Our company's core priorities include consistent quality, customer satisfaction, flexible production planning, and environmental responsibility principles.

+43

Years Experience

Our Vision

To become a sustainable industrial hub that is preferred in Türkiye and international markets for its quality and reliability in metal powder production.

Our Mission

To manufacture high-purity aluminum, zinc, and copper powders, delivering flexible, high-quality, and on-time solutions to our customers, while maintaining a production approach that is environmentally responsible.

Our Annual Production *Capacity*

Our company's total annual aluminum powder production capacity is 2,448,000 kg (2,448 tons per year). In addition, we have an annual production capacity of 192,000 kg of zinc powder and 192,000 kg of crushed copper powder. This capacity can be flexibly allocated among aluminum, zinc, and copper powders in accordance with customer-specific requirements.

Product Portfolio and Technical Specifications

1. Aluminum Powder

- ✓ *Purity: Min %98 Al*
- ✓ *Particle Size Range: 0-2.000 Microns*
- ✓ *Production Method: Atomization*
- ✓ *Particle Preparation: Sieving and classification with micron ranges according to customer requirements*

Product Portfolio and Technical Specifications

2. ınko Tozu

- ✓ *Purity: Min %98,5 Zn*
- ✓ *Particle Size: Classified according to customer requirements.*

Product Portfolio and Technical Specifications

3. Crushed Copper (Copper Powder/Granules)

- ✓ *Purity: Min %98,5 Cu*
- ✓ *Form: Crushed / Milled metal*

Our Technical *Advantages*

- ✔ *High-purity metal raw materials*
- ✔ *True metallic powder structure achieved through atomization*
- ✔ *Particle size classification to customer-specified dimensions*
- ✔ *Flexible production and lead-time planning*
- ✔ *Extensive stock availability and fast delivery*
